

Water testing Report
for
August 11, 2021

Hello Everyone,

We have been having some beautiful hot and very humid weather so far in August. Days prior to the testing we had been having temperatures in the high 20's with high humidity.

Here are the results of the water testing.

1) Old Cottage Lane	e coli reading	60/100 ml
2) Forest Lane	e coli reading	140/100 ml
3) Lawson Lane	e coli reading	20/100 ml
4) Robin's Point Rd	e coli reading	<10/100 ml
5) Discharge pipe	e coli reading	<10/100 ml

The weather on the day that the testing was done, was overcast and 22 degrees celsius. The water temperature was 24 degrees celsius at all of the locations. There was no waves at locations 1,2, or 3, bur small waves at locations 4 and 5. There were weeds present at locations #2, 3 and 5. I am not sure why the e coli result was higher at location #2. The staff at the lab mentioned that there is concern for swimming when the level reaches 200/100ml. I will be testing again next week, so it will be interesting to see if there will be a change in the two weeks.

Enjoy the weather and the water.
Until next time!
