

Water testing
for
August 23, 2021

Hi Everyone,

It is great that the summer hot weather is continuing through August!!

What a great time to enjoy the water!

It was a beautiful morning with sun and cloud at an air temperature of 23 degrees celsius when the water testing was done.

Here are the results of the testing.

#1 Old Cottage Lane	e coli reading	10/100ml
#2 Forest Lane	e coli reading	10/100ml
#3 Lawson Lane	e coli reading	70/100ml
#4 Robin's Point	e coli reading	<10/100ml
#5 Discharge pipe	e coli reading	20/100ml

The water temperature at all of the locations was 26 degrees celsius. There were small waves at the time of testing. There were weeds present in locations #3 and #5. As you can see, the e coli level has significantly dropped at Forest Lane compared to the last testing results.

Hopefully we will be able to enjoy the water for many more weeks to come.

Until next time...

Sue Dougherty
